

BedGuard™

BedGuard™ Ultimate series Mattress Encasement

Creating a Healthy, Allergy-Free Sleep Environment

Here's how it works:

- Unlike fitted sheet style covers BedGuard™ completely encases the mattress to insure 100% dust mite & allergen protection.
- Bed bug proof-Lab tested and proven to stop bed bugs from infesting your mattress.
- Stretch Knit surface is absorbent, 100% waterproof and also breathable like the human skin.
- Cool and totally quiet sleeping surface unlike plastic based products that rustle under the sheets.
- Machine washable in hot water which aids in removing any residual allergen build up.
- Also available in pillow protectors.
- BedGuard™ is classified as a class 1 medical device by the FDA.
- Made in USA.

Protect Your Mattress with

BedGuard™

Dust Mites & Your Health! Uncovered mattresses are the perfect breeding ground for dust mites which can cause allergies, asthma, eczema and rhinitis. Dust mites live on the millions of skin cells and body fluids that humans shed every night. By encasing your mattress with a BedGuard™ cover, you will seal in any dust mite build up currently residing in your mattress and prevent any new allergens from forming. Fitted sheet style covers only protect 25% of your mattress ultimately leaving the mattress exposed to harmful allergens

Mattresses are expensive! The unique breathable membrane in this product will guarantee no fluids or stains make their way onto your mattress. BedGuard™ warrants that this product will protect your mattress from stains and liquids for life. If damage occurs which is covered by this warranty and cannot be cleaned by a professional cleaning company, we will replace the mattress with one of equal value at no cost.

Bed Bugs or Cimex lectularius are becoming an epidemic, again! Since the government ban of DDT, which was used to eradicate this pest in the 1980's, bed bugs have run rampant. Our unique fabric has been lab tested to be bite proof and entry proof. Our exclusive zipper lock system combined with the impermeable fabric creates a block to bed bugs getting in or out of your mattress.
